STATINTL

Pratt & Whitney Aircraft
West Palm Beach, Florida

Dear Bill -

I appreciate very much the little momento which you sent me to commemorate the completion of the test. I believe this is an appropriate time to say how pleased we are with the results of this test. Although things have been moving better for several months, this I believe confirms the trend, and we can now be more confident about our ability to achieve reliability.

I should also say at this time that we are very generally pleased with the progress that has been made in the last month on the whole engine problem. I hope we are now over the hump although we must continue to strive for optimal performance and improved fuel control deliveries.

Please pass on to all of your people my - and in fact, all of our - appreciation of this present level of progress.

Sincerely,

Herbert Scoville, Jr.
